## Cyanide-free silvering Solution

### Why a silver solution WITHOUT cyanide?

This solution is an environmentally friendly and viable alternative to the cyanide-based process for silver deposits.

Workers' health

Environmental protection & compliance

Regulatory constraints & waste management

It glazes deposits with a choice of several finishes: matt, semi-gloss or professional quality glass depending on the type of application. It does not generate toxic waste, simplifies safety measures, and offers a competitive advantage through the use of cleaner raw materials and a high quality coating.
